1	S comes into A&E following a Road Traffic Accident. He is intoxicated with alcohol and admits to being the driver of a BMW that was seen to knock down a pensioner. The Police want to know his address and they want a blood alcohol sample. Can B, the A&E triage nurse give the police this information and the sample without permission from S?	B may only give the address;	B may only give the address;	Correct	10
2	C dies from Cysticercosis, a disease caught from eating affected pork. The patient's family, who are religious Jews, do not want any mention of this disease on the death certificate. What should doctor D write on the death certificate?	The matter should be discussed with the coroner.;	The matter should be discussed with the coroner.;	Correct	10
3	A man has been attending the neurology outpatient clinic. He has been seen by the consultant, Dr E, on five occasions over the past year. He has an HIV related brain tumour and continues to have epileptic seizures both during the day and night. On each occasion the consultant tries to obtain the agreement of the patient both to not drive and to inform the DVLA of his medical condition. However, he says that she cannot inform the DVLA as he will lose his job if he can't drive. Dr E explains that if he continues to drive she will have to inform the DVLA. The patient says this is unacceptable and then runs out of clinic saying "the parking meter needs re-filling", but does not return. What should E do?	E should write to the DVLA about the driving and at the same time write to the patient telling him what he has done.;	E should write to the DVLA about the driving and at the same time write to the patient telling him what he has done.;	Correct	10
4	A patient is seen in the infectious diseases clinic. He is HIV positive with no current need of anti-retroviral treatment. He admits to being sexually active but is adamant that he always uses a condom. He does not want his GP to know of this diagnosis. Can the clinic doctor, F, nevertheless write to the GP and inform her of the man's diagnosis?	F should respect the refusal to contact the GP in this case.;	F should respect the refusal to contact the GP in this case.;	Correct	10
5	A patient is eight weeks pregnant. She wishes to have a termination without the knowledge of her husband, whom she confirms is the father of the fetus. Can the doctor, G, perform the termination without the husband's knowledge?	The termination can occur without the husband's knowledge.;	The termination can occur without the husband's knowledge.;	Correct	10
